### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 6, 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Toy.

Toy discloses a metal plate (14), first and second ribs (11), extended lips (17), wherein the extended lip facilitates assembly of the electromagnetic gasket into a receiving device (4), or chassis member (re claims 1-4)

Re claim 6, see col. 5, line 10.

Re claim 8, see Fig 14

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5, 7, 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Toy.

The teaching as discussed above does not disclose the receiving device made of aluminum, the shielding component including a coating of tin, or the width of the gasket is 2 cm or less. It would have been obvious to one having ordinary skill in the art at the

Art Unit: 2831

time the invention was made to use aluminum for the receiving device or a coat of tin for the shielding component of Toy, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416. It would have been obvious to one having ordinary skill in the art at the time the invention was made to select a specific size of the gasket of Toy, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

#### ***Allowable Subject Matter***

Claims 10-19 are allowed

The following is an examiner's statement of reasons for allowance:

The limitation "the receiving device includes slots" of claim 10, "at least one storage array module inserted into the at least one drive bay" of claim 16, " in combination with other limitations present is neither taught nor disclosed in the prior art of record.

#### ***Response to Arguments***

Applicant's arguments filed 11-09-04 have been fully considered but they are not persuasive. Applicant argues (1) that there is no mention in Toy the using of the springy fingers to facilitate assembly of the sealing strip into the groove. With respect to (1), the

Art Unit: 2831

extended lips (11) of Toy are functioning as claimed and it has been addressed in previous paragraphs.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
